Project Title: Great Barrier Reef

I'd like to make this site a fun educational resource about the Great Barrier reef, especially emphasizing the need to protect it. There is a lot of information, so I think it'd be good to organize in multiple pages.

- Home Page / Introduction: Introduce what the Great Barrier Reef is, it's discovery, and its general geology.
- Ecology: demonstrate all the life that resides in the reef
- Environmental threats: make sure this is clear!
- Human Use
- Protection plan
